Response to Amendment

The examiner acknowledges amended claims 2-3 and 8, and new claims 9-18.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Regarding claims 1-18, the prior arts fail to teach or fairly suggest determining the position of a transponder crossing the segment perpendicular to the route by measuring phase difference between outputs of the first and the second receivers only.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

O'Connor et al., "Transponder Location And Tracking System And Method", US 5,227,803, 7/13/1993,

whereby O'Connor discloses that location of a transponder is determined by two angles evaluated from two array antenna receivers 102 and 104, while the applicant claims that the position of a transponder crossing the segment perpendicular to the route is determined by measuring phase difference between outputs of the first and the second receivers only.
